### Local and General

Happenings Here, There and Everywhere, Past Present and Future

Monday—Labor Day was generally observed as a holiday in town.

I. H. Holden, editor of the Cereal Recorder, paid us a fraternal call this week.

Baby Gordon Harding, of Youngston, nephew of Mrs. O. Hinds, is on the road to recovery.

The Crown Lumber Co. this week sold six grainaries to one man. He must be preparing to hold his crop.

Lost about two weeks ago a ladies' hand bag. Finder please leave with Mrs. Nicholson, or at this office.

Just arrived! Three cars of Newcastle lump coal and one car stove coal. Get our prices. C. W. Rideout, U. G. G.

Mr. Boyer, the reeve, has gone on a round trip to Saskatoon, Artland, Edmonton, Morris, and back by way of Munson. He expects to be gone for about ten days.

Ladies! We are reducing our stock of ladies' shoes and Oxford's. We have some very good bargains in the above lines and it will mean money in your pocket to look over these snaps. J. R. Miller.

Mrs. W. E. Ironside has put in a stock of fall millinery at her home in Cereal. Before coming to Cereal, Mrs. Ironside spent several years in the millinery business, going twice a year to New York and Chicago on buying trips. Mrs. Ironside will be very pleased to show her stock on and after September 12th.

Mrs. E. T. Mitchell, M. A., who is a gold medalist in mathematics, has accepted a position as instructor in that subject at the University of Alberta in Edmonton. She left this week to take up her new duties. Her leaving here is much regretted as she had made herself valuable to the community. Her services as secretary of the Red Cross deserve special mention. She also acted as secretary to the Women Institute and in every way did her best to help along every good work. Mr. Mitchell remains here to complete his season's work as inspector of schools, after which he intends to proceed to Harvard to continue his studies.

### Advance Chinook!

J. R. Miller was a visitor to Oyen on Thursday.

Mrs. Hinds entertained a few friends on Thursday afternoon.

Mrs. May, of Alsask, is on a visit to the home of Mr. and Mrs. Wylie.

D. Clark, of Kilmarnock, Scotland, is visiting at the home of A. Wilson.

E. Philips, government sanitary inspector is here looking the town over.

Mrs. Good, of Didsbury, is here on a visit to her daughter Mrs. Cruickshank.

Mrs. Woodruff is providing tea for the Ladies' Aid, on Sept. 17th at her home.

Mr. Mitchell has sold his house to Mr. Carter. The house will be occupied by Donald Gordon.

Mr. Benj. White, of Peterboro, Ont., has been here on a visit to his nephews, Herbert and Ed Payne, near town.

W. Thorne, general manager of the Imperial Lumber Yards, Ltd., spent a day in town looking over the firm's property here.

Mrs. and Miss Till, who have been visiting at the home of J. M. Davis, near Colloholme, have returned to their home in Calgary.

Dinty Moore club dance held on Monday night was not as well attended as might have been had threshing not been in progress, still a good number of couples were on the floor and all report a good time.

Our readers will observe from the notice published in this issue that the Rural Municipality of Colloholme is determined to collect the money outstanding on seed and feed supplied, and for which they hold liens on many crops. Everyone therefore should make the best of it and pull in the necessary grain as soon as possible and get done with it.

### BORN

**SHORT**—To Mr. and Mrs. W. H. Short, of Chinook, on Aug. 22nd, a daughter.

**MARTIN**—To Mr. and Mrs. Martin, of Big Stone, on Sept. 4th, a daughter.

### Freight Rates Wheat Prices Go Up

The Board of Railway Commissioners have this week granted to the railways the right to considerably increase their freight and passenger rates. The new rates go into effect on Monday.

In Western Canada, an increase of 35 per cent on freight rates is granted until December 31st, after which date, a decrease of 5 per cent is to be made. Passenger rates go up 20 per cent (but not to exceed 4 cents a mile), until December 31st, when a decrease of 10 per cent is to be made.

After July 1st, 1921, the passenger rate returns to what it is at present. Excess baggage rates increase 20 per cent. The sleeping and parlor car rates go up 50 per cent.

An appeal against the new rates will probably be entered.

### Publication Suspended

Mr. Smith, of Oyen, who is to take charge of the production of the Chinook Advance, will be unable to get here for about two weeks. It will therefore be necessary to suspend publication of the paper for that time.

### School Attendance

Please take notice that parents are not allowed to keep children under 15 years of age out of school without having first obtained a permit from the Principal of the school.

Signed of behalf of the Board of Trustees;

LORNE PROUDFOOT,  
Secretary.

W. J. Bingham, shareholder in Alberta Farm Operators, has been here looking over the land. He expressed himself as highly pleased with the crops.

Never send a dollar away from home when the article that the dollar will purchase can be obtained at home. Money is our financial blood. Its circulation keeps the business body alive. Bleed that body by sending money away and business will soon put on a look of lethargy. Always trade at home. Watch the bargains offered by enterprising advertisers in this paper and you will learn the best places to spend those home dollars.

Wheat dropped 16 cents at points on the C. N. R. this week. Elevator men state that this is due to the fact that the railway will be unable to get the grain out before December and purchases must be made on December prices. The price of \$2.16 (Thursday) is 16 cents lower than that being paid on C. P. R. point.

Another factor which enters into the drop is the increased freight rate of 35 per cent, which becomes effective on Monday, and which makes a difference of about seven cents a bushel.—Plaindealer, Youngstown.

### Wheat Up Again

LATER—Since above, from Youngstown Plaindealer, was set in type, we learn that wheat has again gone up in price and now stands at \$2.30 for No. 1; \$2.27 for No. 2 and \$2.22 for No. 3. Oats are now bringing \$5c.

### Preparing Lock-Up

At the regular meeting of the village council, held on Friday, September 3rd, the secretary was instructed to write to headquarters for a permit to allow the R. C. M. P. officer here to act as village constable, whenever such services are required.

The Reeve was appointed a committee of one to see to the erection of a cell in the town offices.

A letter from the C. N. R. roadmaster, at Hanna, stated that the company at present had no cinders for sale. The council has been endeavoring to secure cinders for the streets and crossings in town.

### Ladies' Card Club

The Ladies' Card Club met at the home of Mrs. Meade, on Thursday evening, September 9th. Mrs. Lloyd Robinson had the highest score, she having made 148 points.

The club will meet at the home of Mrs. Yake, on Thursday, September 16th.

The elevators report wheat to be coming in in large quantities,

## Only a sharp blade gives a perfect shave

An unstrapped blade cannot give as good a shave today as it did yesterday and must soon be discarded.

The exclusive self-stropping feature of the AutoStrop Razor ensures from each blade as perfect a shave each day as the day before. It is as easy to clean as to strip nothing to unscrew or take apart.

Any dealer will demonstrate the AutoStrop Razor to you, guarantee satisfaction or refund of purchase price.

### AutoStrop Razor sharpens itself

Only \$5.00—complete with strap—twelve blades in an attractive assortment of cases to suit any purpose.

**AutoStrop Safety Razor Co., Limited**  
AutoStrop Building, Toronto, Canada

## Women's New Status

Ratification by the legislature of Tennessee of the amendment to the constitution of the United States extending equal suffrage to women was noteworthy in that it made the 36th State to approve of the amendment, and consequently made possible the promulgation of the new constitutional change as binding upon the whole nation. As a result between 15,000,000 and 20,000,000 women will be added to the list of qualified voters in the presidential elections next November. In other words, there will be in the neighborhood of 40,000,000 eligible voters in the United States, a number unequalled in any other country.

What effect this large enfranchisement of new voters will have on the fortunes of the Republican and Democratic parties it is difficult to say. The probability is that in this first election the women will, as a general rule, vote the same ticket as their men folks, but as the years go by and women develop an aptitude for public affairs and a distinct political consciousness, it is altogether likely that marked changes will be effected in party policies and methods.

The innovation will be for the good of the country and the world, because, naturally, the woes of the people of other parts of the world will appeal more strongly to the women than they appear to have done to the big financial and commercial interests of the United States dominated by men judged by the treatment accorded the peace treaty and the League of Nations. There will probably be less selfishness and more humanitarian feelings in American politics of the future.

The enfranchisement of millions of women will also, in all probability, have the effect of definitely settling the much vexed question of prohibition and assure the retention of prohibition of the liquor traffic as a permanent policy of the United States.

In the extension of full citizenship rights to women, Canada led the United States, first the provinces and

then the Dominion taking this advanced and enlightened action. In this country, too, this undoubtedly means the deathknell of the liquor traffic. In other respects the effect of the entry of women into politics is distinctly noticeable. Greater attention is being paid by governments to the problems of health and along many lines making for human betterment in moral and social conditions, and, in particular, in the direction of legislation establishing and protecting the rights of women, working girls and children generally.

So, too, the presence of women in the legislatures of Manitoba, Saskatchewan and British Columbia, and almost certainly in the next Dominion parliament, as well as upon municipal councils and school boards, is bringing new angles to the consideration of public matters of far-reaching importance. To an increasing extent in the future, business in the government and the practical side of administration will be softened by attention being devoted to more sentimental and aesthetic considerations.

As a consequence of a participation of women in public affairs there must come, as there always does from a general entry into business, a greater self-reliance on the part of the women themselves. They will need it, because, as they increasingly engage in occupations formerly regarded as the exclusive prerogative of the men, it is inevitable that the old deference paid by men to women will become less in evidence. This tendency, regrettable as it is, is already noticeable in small matter, as, for instance, the growing reluctance of men to give up their seats to women in crowded cars or other places of assembly, or to giving them precedence in a crowd. Women will miss these little old-time courtesies, and it is a pity that they should pass, as already there is too little gentleness and courtesy in this matter-of-fact, workaday world. But it is a price that, apparently, must be paid in this new age of absolute equality between men and women.

It is to be hoped, however, that mothers will still inculcate in their sons a high regard and respect for, and gentleness and courtesy towards, women, and that all men will strive to maintain such an attitude towards women even in the stress, strife and turmoil of business and political life, and that the women will endeavor to be worthy of such regard from the men, so that, with all the undoubted advantages of this new era the world may not lose all the old chivalry of the past.

### Minard's Liniment For Dandruff.

The pack of sockeye salmon this year on the Fraser River will be the largest since 1916. The run of salmon of all kinds in northern British Columbia is also exceptionally good this year.

Away With Depression and Melancholy.—These two evils are the accompaniment of a disordered stomach and torpid liver and mean wretchedness to all whom they visit. The best way to combat them is with Farmer's Vegetable Pills, which will restore the healthful action of the stomach and bring relief. They have proved their usefulness in thousands of cases and will continue to give relief to the suffering who are wise enough to use them.

### A Monster Zeppelin

According to experts, the newest Zeppelin type to be constructed will be capable of carrying a load of sixty tons, and, with 500 passengers, cover a distance equal to three times across the Atlantic without having occasion to re-fuel.

"My father objects to you because he says that you are unable to meet your creditors. Is this true, Algy?" "No, Angy, 'pon my honor! I meet them wherever I go."

## Mineral Wealth of Quebec

### Discoveries in North Country Are Becoming Richer

H. L. F. Blake, representing several English syndicates, who has been exploring Chibougamau and Northern Quebec with a party arrived recently at Montreal on his way down the North Shore to make further explorations in Ungava. Mr. Blake reports that the mineral discoveries in the north are becoming richer and richer on each occasion he visits the interior of the country, and predicts that the day is not far distant when the large steel interests will look to Northern Quebec for their raw material. The enormous water powers will supplant coal in the production of iron and steel and will make Quebec one of the richest parts of the Dominion; if not of all America, from the mineral point of view.

### Minard's Liniment For Sale Everywhere

#### Thousands Found Positions

Since the beginning of the year the Alberta government employment bureaux have placed over 20,000 men and women in positions. Last month, out of 6,141 applications from men and 1,796 from women they were successful in placing 5,480 men and 1,635 women.

## CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but tough laxative which can only be depended upon to stimulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opium or other injurious drugs. Consider the following statement of Dr. J. H. Minard, Lake Baker, N.B.: "I desire to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation." The Tablets are sold by the dozen and by the box at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A fisherman has plenty of time in which to think out scary stories.

The young man who praises the poetry of his young lady acquaintance is beyond his years.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subside. Miller's Worm Pill will alter these conditions almost immediately. Take a teaspoonful away. The destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine, most beneficial to the young constitution, and as such it has no superior.

**More Valuable Crop Than in 1915**  
C. E. Neill, general manager of the Canadian Bank of Commerce, says that the value of this year's crop on the prairies will be greater than it was in 1915, although the yield will be somewhat short of that banner year.

**Second Crop a Record**  
The second crop this season of alfalfa in Southern Alberta is making splendid progress and promises to be a record crop on top of a record first cutting.

Mrs. Watts—"Are you anxious to earn a good dinner, my poor man?" "Tramp?—Not half as anxious as I am for the dinner."

Minard's Liniment Co., Limited, Dear Sirs—I had a bleeding Tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINIMENT and after using it every day it has lived all up and disappeared altogether. DAVID HENDERSON, Belleisle Station, Kings Co., N. B. Sept. 17, 1904.

### Not There

"Ernest," said the teacher, "tell me what you know about the Mongolian race."

"I wasn't there," explained Ernest hastily, "I went to the football game."

Every cow in Belgium must wear ear-rings. Breeders of cattle are obliged by law to keep an exact account of the animals raised by them, and the ring, on which is engraved a number, is fastened to the animal's ear to prevent substitution of one animal for another.

No, the average man doesn't understand classic music — and he is proud of it.

In proportion to its size, the bee is 30 times as strong as a horse.

W. N. U. 132

## PURITY - QUALITY - ECONOMY

With the increased cost of labor and materials due to war conditions, it is not reasonable to suppose that a really first class baking powder can be made and sold at the old prices. Rather than sacrifice the quality of

## MAGIC BAKING POWDER

we found it necessary to make slight increases in price during the war period. Even though Magic Baking Powder may cost a few cents more than the ordinary kinds it is still by far the most economical baking powder on the market to-day when purity, strength and leavening qualities are taken into consideration.

### Contains No Alum

### Made in Canada

## Faith Cures

### Sensitivity of the Mind A Determining Factor in Respect

#### To Health

There is nothing new in the cures reported through the medium of the "bleeding sacred status" at Templemore, Ireland. St. Anne's, Beaupres, Quebec, is a shrine at which thousands are said to be cured every year. These are faith cures, and for certain ailments, such cures are neither strange nor unusual. Reversely, a perfectly well man may be made to feel ill by being told that he looks ill and must be ill. The sensitivity of the mind is often a determining factor in respect to sickness and health. But the only sure way of curing disease is to consult a competent doctor and to follow his advice and the word "doctor" does not necessarily mean the medical profession only—Calgary Herald.

### More Ships for Canada

Because of the great increase in shipping Canada is building 63 additional ships this year. These ships will sail all seven seas, so the Minister of Marine and Fisheries for Canada recently stated in public.

### Teachers' Big Task

In the schools of Winnipeg the English language is being taught to hundreds of children who among them speak no less than thirty-four different languages.

## Make your light food nourishing

Put a spoonful of Bovril into your soups, stews and pies. It will give them a delicious new savouriness, and you will be able to get all the nourishment you require without making a heavy meal.

## BOVRIL

## SAVE the HORSE

### Horses can only do so much work—make the loads as easy as you can.

### IMPERIAL MICA AXLE GREASE

Helps the horse by preventing friction between the wheel and the hub. It coats the hub with a smooth hard surface—lubricates thoroughly. Takes the strain off harness and horse.

### IMPERIAL HARNESS OIL

Penetrates into the harness—makes it waterproof—repels insects—keeps straps and tugs strong and pliable.

Prevents cracking and breaking of stitches. It is a pure mineral oil, free from acids and can not become rancid.

### FAR FAMED PRODUCTS

Imperial Mica Axle Grease and Imperial Harness Oil are the best axle greases and better products can be obtained at any price.

### IMPERIAL OIL LIMITED

FOUNTAIN PLATE, LIGHT LUBRICATION, BANFF, CALGARY, LTD.

## Fine Buildings for Fine Farms

YOU have modern machinery, modern equipment, a real up-to-date modern farm—but how about your buildings? Are they as modern as your equipment?

Do you house them in unsanitary, dark, damp barns that decrease their efficiency and profit?

How about your stock? Do you take a chance and house them in unsanitary, dark, damp barns that decrease their efficiency and profit?

How about your good wife and yourself? Are you any less important than any or all of these?

### Fine Buildings Make Fine Farms

The time was never more opportune to realize the long-needed improvements—in new buildings, additions, repairs—A NEW HOME. Now, on the basis of a low crop, you can buy property with the participation certificates coming in—surely the money was never better set aside. The hard-earned freight for your new home can be realized. Your farm should have buildings worthy of its owner and its prosperity. Make buildings dream of your good wife, a healthy, comfortable home and a happy, peaceful atmosphere to the farm by building now.

### Consult Your Lumber Dealer

He is the authority because he has at his command the best information, the best plans—the best service that can be secured. He will give you all the co-operation without charge. Will deliver lumber when you want it and ensure that you get just enough—without waste.

Ask him for the 100-page book "Better Buildings."

### Build Better Buildings—Build Now

This announcement is issued by the Lumber Manufacturers of Western Canada

## BUILD NOW

## Comes already sweetened

Its own sugar is developed in the baking. It solves your sugar problem among ready-to-eat cereals.

## Grape-Nuts

Order a package from the grocer.  
Its flavor appeals and there is no waste.

Made by Canadian Postum Cereal Co., Ltd., Windsor, Ontario.

# Government Plan Of Insurance for Returned Soldiers

Ottawa.—The Returned Soldier Insurance Act, passed by Parliament last session, has come into effect. Applications are now being received, and policies will be issued as rapidly as possible.

A returned soldier who served in the naval, military or air force, or Conscripts in the great war, or who was domiciled or resident in Canada on August 4, 1914, and served in any of His Majesty's naval, military or air forces, or in the forces of any of the allied or associated powers, may obtain life insurance under the act. The applicant must, at the time of insurance, be domiciled and resident in Canada.

Wilds of returned soldiers who died after retirement, or honorable discharge from the service, and before the expiration of twelve months from the coming into force of the act, are also eligible for insurance under the scheme.

Policies will be issued for a minimum of \$500, up to and including \$3,000 up to \$5,000. The act was framed primarily with the object of giving to the returned man, whose physical condition, by reason of war service, prevents him from obtaining life insurance at nominal rates, an opportunity to give his dependents this advantage.

The government insurance policy is different in some respects to regular policies by regular insurance companies as the object of the scheme is protection of the dependents of the insured. Only immediate dependents may be named as beneficiaries, and no provision is made for policy loans. The insurance money is not subject to the claims of creditors of either, the insured or the beneficiaries, and cannot be assigned. Only one-fifth of the policy is payable at death in a lump sum, the balance to be applied as an annuity under various plans to be selected by the insured.

An exceptional advantage to the act is the provision made for a disability benefit, not given elsewhere at such advantageous rates. Under this clause, should the policy holder become totally and permanently disabled, he is at once relieved from paying further premiums, and the insurance is paid to him direct as an annuity of one-twentieth of the amount of his policy for a period not exceeding twenty years. Should he not survive in this period, the balance due is paid to his beneficiaries.

Policies may be taken out on several limited payment plans or for whole life, and premiums may be paid monthly, quarterly, half-yearly or annually, according to the convenience of the insured.

Explanatory booklets and application forms have been forwarded to the various returned soldier organizations. The controllers of the returned soldiers' insurance have their offices in the Transportation Building, Ottawa.

## Alberta's Big Crop

Expecting Average Wheat Yield of 20 Bushels an Acre.

Calgary, Alta.—Reports coming to the offices of the United Grain Growers, Ltd., in Calgary, indicate that the average wheat yield in Alberta will be twenty bushels an acre. Previous estimates placed the average at eighteen bushels, but the threshing returns that are coming in are highly satisfactory and give rise to the belief that the bigger figure will obtain.

**Increased Output Result of Smoking**  
London.—An allowance of time for smoking at Dick Kerr's works at Preston has been so successful that the directors have decided to develop the experiment. Three months ago the men were granted permission to smoke for fifteen minutes each morning and afternoon. The management have now extended the privilege from 9 to 1.30 and from 3 to 4.30.

It is stated that the granting of smoking time has resulted in increased output.

## Training for Air Force

Ottawa.—The regulations governing the training operations of the Canadian Air Force are expected to be approved by cabinet council this week, after which training will begin in earnest at Camp Borden and other air force training centres.

W. N. U. 132

## Journalists Dine On Buffalo Meat

Something New Was on Bill of Fare For Press Delegates

Jasper, Alta.—Viscount Burnham, in coat and apron, carved a great launch of buffalo for the luncheon given the Imperial press delegates at Jasper National Park, on the shores of Lake Beauvert. It was altogether a holiday party which gathered under the genial climate of northern Alberta. The weather could not have been improved.

Sir Emley Carr, publisher of the News of the World, in acknowledging the kindness of all the park authorities, said it was a distinction that only Canada could provide.

The wonders of Maligne Mountain were visited in the afternoon, while the visitors eagerly returned to Lake Beauvert to bask in the sunshine and color of the picturesque scene of the water in Jasper Lake. The party entrained in the early evening for the next stopping point.

## U.S. Trade Increasing

Notwithstanding Technical State of War Exists, Trade With Germany Grows

Washington.—Although a technical state of war still exists between the United States and Germany and Austria, trade with those countries is rapidly increasing. Reports of the department of commerce show that exports to Germany totaled \$202,176,079 during the 12 months ended last June 30, as compared with \$8,818,882 during the corresponding 12 months the year before. Imports from Germany jumped from \$94,981 in 1919 to \$408,975 during the year ending July 1.

Trade to Austria as distinguished from Austria-Hungary were valued at \$1,847,127, as compared with nothing for the year before. Imports from that country from the same period were valued at \$587,108.

Trade with Russia in Europe also showed a substantial increase in the past year, exports being valued at \$34,639,901, as compared with \$11,000,000 the year before. Imports from that country, however, were valued at only \$2,443,288.

## Bush Fires Destroy Homes

Sixteen Farmers in Manitoba Suffer Heavy Loss

Winnipeg.—Sixteen farmers in the Ste. Rose du Lac district have lost their homes, barns, implements and crops in bush fires that have been laying waste the area in the last few days, according to an official report by provincial authorities. Thousands of acres of haylands, and hundreds of tons of cut hay have been destroyed in the northern part of the province.

The danger in all sections is at an end for the present, however, as account of the rainfall, which was fairly general over Manitoba.

## Establish Steel Plant

Considering Advisability of Manufacturing Commodity in B.C.

Victoria.—A rolling mill and blast furnace for the manufacture of steel is expected, will be established in this province as soon as the necessary market for the product of such an undertaking has been assured, according to Major Martyn, industrial commissioner for the province, who, with James H. McEvily and Nichol Thompson, of the advisory council of the British Columbia department of industries, has left for Chicago and San Francisco in connection with the matter.

## League's Hotel at Geneva.

Geneva.—The Tribune announces that the League of Nations has purchased a hotel here. The purchase price is declared to be \$500,000 francs.

**Tartars In Revolt Against Bolsheviks**  
Baku.—Revolutionary outbreaks against the Bolsheviks are reported among the Tartars. The disturbances were caused by the increased cost of living, which is now twenty times greater than when the Soviet government was instituted.

## Millions Are Involved in Big Law Suit

ACTION TAKEN BY STEEL CO.

Claim Payment for Rails Rolled Under Government's Orders

Ottawa.—A suit involving several million dollars, the point at issue being the value of steel rails which the Dominion government, under the authority of the war measures act, compelled the Dominion Steel Company to roll during the war period for the use of Canadian railways, will be heard by the exchequer court at a sitting which opens on September 27.

The amount involved is \$8,727,617, less cash already advanced to the extent of \$5,300,000. This makes the actual amount in dispute upwards of three and one-quarter millions with interest.

The amount of rails rolled under the government's order was something in excess of 100,000 tons, for which the company seeks payment at the rate of \$75 per ton. As the government considered the price too high a provision was made by an order in council for a reference of the dispute to the exchequer court.

The rails were delivered under the government order to the Grand Trunk Pacific and other roads. These railways have been made parties to the proceedings before the exchequer court, the purpose being to have the court declare that the railways just pay for the rails received the amount the court finds to be fair and reasonable.

## Trout for Jasper Park

Ottawa.—The waters of the Jasper Park have again been stocked from the hatchery at Banff, Alta., operated by the fisheries branch, department of marine and fisheries. Rainbow trout have been planted in Patricia Lake to the number of 10,000; Hibernia lake, 5,000, and Marjorie lake 5,000 salmon trout were also planted in Pyramid Lake to the number of 24,300.

## Peace Talk at Minsk Has Been Postponed

Delegates Are Planning, However, To Resume Negotiations Within Week

Warsaw.—Peace negotiations between the Polish and Russian delegates at Minsk have been interrupted, according to a wireless despatch just received here. Most of the Polish delegates have left Minsk for Brest-Litovsk, while the Bolshevik representatives have gone to Moscow, both sides are planning to resume the conference within a week, probably at Riga.

Letvia has agreed to permit Poland and Soviet Russia to transfer the Minsk peace conference to Riga. This was done on the request of the Poles.

## Harvesting Well Advanced

Reports Indicate that Crops will Average from 15 to 40 Bushels.

Winnipeg.—The grain fields throughout Western Canada present a continuous scene of harvesting activities, according to a crop report issued today by the Canadian National Railways.

Eastern and Southern Manitoba wheat cutting has been practically completed and threshing is in progress in all sections and many farmers have finished and are now engaged with their fall plowing. In Central and Northwestern Manitoba from 60 to 70 percent of the wheat cutting has been done and threshing will be fairly general this week.

In Central Saskatchewan and Alberta cutting is also well advanced and threshers are appearing in the fields in greater numbers every day. Rapid progress has also been made in Southern Saskatchewan and Alberta with the saving of the crops and plowing operations are following close upon the threshers.

Up to the present the weather has been favorable for the harvest. A few days' delay has been caused by rain, but the indications are that the work of cutting and threshing the grain will be cleaned up in good shape and in good season.

From all parts of the country the reports are that the grain is of good quality and the yield from 15 to 40 bushels to the acre. The heaviest yields seem to be in Alberta, but the other provinces also report some crops that yield from 25 bushels an acre upwards.

## Further Gains Are Reported By the Poles

BOLSHEVIKS LOSING GROUND

Repeated Efforts to Encircle Lemberg Have Resulted in Failure

Ottawa.—Further gains on the northern front are reported in the Polish official communication which says the Polish troops occupied Ausigusto, northeast of Grodno, where they were enthusiastically received by the population. Lithuanian detachments encountered by the Poles were repulsed.

The Bolsheviks are continuing to give way before Polish pressure in the Bialystok sector, say the communication. The Poles have recovered Narew. The Russians are preparing to make serious resistance in the region of Malanowski river.

Quiet prevails in the Brest-Litovsk sector. The Poles are resisting repeated efforts to encircle Lemberg, Prabie, which had been temporarily evacuated by the Poles, has been repulsed in a counter-attack.

Bolshevik attacks upon Zaworzec, east of Lemberg, have been repulsed with heavy losses. General Budenny's forces have been driven out of the region of Zydzowec and Chodow, south of Lemberg.

London.—The Poles have taken Suwalki, about 40 miles northwest of Grodno, it is announced by Lithuanian representatives here. A Polish division is reported to be advancing on Seinay, east of Suwalki.

## NEWS OF THE PROVINCES

### MANITOBA.

Winnipeg.—One million bushels of new wheat, a large part of it No. 1 northern, has already passed through Winnipeg.

Winnipeg.—Street car fares in Winnipeg have advanced to seven cents, with four tickets for 25 cents. A newspaper statistician estimates that 10 percent of the usual number of city passengers, or 15,000, will walk to work or pleasure until they become accustomed to the new rates.

### SASKATCHEWAN.

Moose Jaw.—The announcement was made that the Southern Saskatchewan Stockyards are to take over the stockyards of the C.P.R. here. The result of this will be that Moose Jaw will have the largest yards west of Winnipeg and will still further increase the already large trade being done here.

Regina.—A few isolated cases of typhoid are reported throughout the province at the present time, according to Dr. M. M. Seymour, commissioner of public health. The general health of the province continues to be normal.

### ALBERTA.

Calgary.—The first car of wheat of the season reached here today from the Coalville district grown on dry and, averaged No. 1 hard; went 25 bushels to the acre, and weighed 60 pounds to the bushel.

Calgary.—At least \$2,000,000 Dutch capital is coming to Western Canada, of which \$1,000,000 will be placed in Alberta, according to F. M. Wachtel, of Rotterdam, who represents Netherlands capital that is seeking investment in the Dominion.

Calgary.—An idea of the demand may be gathered from the fact that during the last week in August more than 1,000 men were placed by the government bureau at this kind of work. Three hundred and thirty-six other applicants for work were also placed, and on September 1 there were 1,000 vacancies reported, most of them for unskilled labor.

### Grain Movement Starts

Winnipeg.—One million bushels of new wheat have already passed through Winnipeg, according to the estimate of a prominent grain exchange official.

A large part of this wheat grades No. 1 Northern, and the percentage is said to be higher than in previous years.

### Collect \$915,000 in Revenue

Vancouver, B. C.—From the three great revenue collecting departments of the Dominion government at this port, the federal treasury was enriched as the result of the business transacted in August by \$915,000.

## Strong Bonds That Unite in Friendship The British Empire

Ottawa.—Imperial relationships and Canada's part therin were discussed at a gathering of the Bar Associations. The speakers were Viscount Cave and Hon. W. E. Raney, attorney-general for Ontario.

Lord Cave's reference to Imperial relations came at the end of an address in which, as a former home secretary and solicitor-general, he had been able to present an intimate view of British war legislation. The League of Nations, Lord Cave said, was a grand conception, but much time and effort must be expended before it can come into existence.

Lord Cave referred to the effect of the war upon the relations between the Old Country and the Dominions. "For a generation," he said, "some of the ablest statesmen of the time—Rosebery, Chamberlain, Grey and others whose names will occur to you—were considering how best a further link could be forged between the Central and Dominion Governments which should be neither so stiff as to gall, nor so weak as to break under strain. It may be that the problem has been solved, quietly and almost unconsciously, 'as our habit is,' by the establishment of the Imperial War Cabinet, as an effective council of the empire. That assembly of the leading statesmen of the self-governing parts of the empire, first called together in 1917, for the purpose of discussing the conduct of the war and some of the higher issues of Imperial policy, proved to be of so much service both to its members and to the countries concerned, that it was unanimously determined at the instance of the British prime minister, to keep it in being, and so other meetings took place at a later crisis of the war and again when the terms of peace were under consideration. The experiment—for at first it was nothing more—proved an unequalled success, and to many of us it seems possible that the Imperial War Cabinet may, if the Imperial conference should so determine, drop its middle name, and while retaining wholly voluntary and consultative powers, may come in word affairs the nerve centre of the autonomous nations of an Imperial Commonwealth."

"The League of Nations," Lord Cave concluded, "is a great conception, but much time and effort must be expended before it comes into full fruition. In the meantime, there is a league in being, a league strong, effective and loving, nurtured in independence, skilled in self-government, ambitions for no 'world empire,' but only for a world peace—the league of British nations. The bond which unites its great component units—Canada, Newfoundland, Australia, New Zealand and South Africa—is no chain of possession, but the hand-clasp of freedom. It is founded on two principles, the autonomy of all and the voluntary co-operation of all; and while we are true to these principles, to each other, and to our King, no enemy can prevail against us."

## International Plane Service

Plan to Operate Mail Planes Between Victoria, B.C., and Seattle.

Washington.—An airplane mail service will be established next month between Seattle, Wash., and Victoria, B.C., Postmaster-General Burson announced. Bids have been asked for operation of the service between October 15 and June 30, 1920, by hydro-airplanes, with routes being located on Puget Sound, 84 miles apart.

Mail between the United States and Oriental points can be greatly expedited by the installation of an air service between the two cities, the department believes, since many trans-Pacific steamers use the Victoria terminus. Mail is now held there awaiting transfer to other boats for the balance of their trip, while United States mail destined for the Orient sometimes loses two or three weeks by not making connection with outbound ships at Victoria.

### Two Airmen Badly Burned.

Deshler, Ohio.—Two aviators, W. L. Smith and Edward Haigh, both of New York, were severely burned when their airplane, carrying mail from Chicago to New York, broke into flames more than 5,000 feet above the earth, near here yesterday. The plane was not badly damaged, and the mail was unharmed.

Honolulu.—The Prince of Wales has arrived here on the battleship Renown. The Prince, in his speech, said that the machinery ready for the taking of votes under the Canadian Temperance Act, and in the by-elections, it has been found that a large percentage of the forms used in former elections cannot be utilized in any way under the new Election Act.

### New Election Form

Ottawa.—With practically all the machinery ready for the taking of votes under the Canadian Temperance Act, and in the by-elections, it has been found that a large percentage of the forms used in former elections cannot be utilized in any way under the new Election Act.

### LIST OF PRIZE WINNERS AT THE FAIR

(Continued)  
Fancy Work

Baby carriage robe and pillow, Mrs. L. Robinson, 1st; Mrs. Waterville, 2nd.

Dressed doll by girl 12 years and under, Irene Marcy, 1st; May Todd, 2nd.

Pin cushion, girl 12 years and under, May Todd.

Knitting in wool, girls 12 and under, Irene Marcy, 1st; May Todd, 2nd.

Crochet in cotton, 12 years and under, Irene Marcy, 1st; Arthur Woodruff, 2nd.

Crochet in cotton, 16 years and under, Margaret Bayley.

Special by Mrs. Whitlock for set of 4 crocheted bullettoilies, Mrs. G. Robertson.

Special by Dr. Chandler for set consisting of sweater, tam and scarf, knitted of crocheted, Mrs. Rideout.

School Work

Children under 16 years  
Map of Canada, Duncan Robins, 2nd.

Map of Prairie Provinces, Duncan Roberts.

Penmanship, Lillian Shaw 2nd;  
Vernon Aarsby, 3rd.

Freehand drawing, Duncan Roberts, 1st; Lillian Shaw, 3rd.

Children under 12 years

Map of North America, Lillian Shaw, 2nd.

Copy book; Crystal Aarsby, 1st

Freehand drawing, Lillian Shaw, 2nd.

Special by N. F. Marcy, collection 3 exercise books, Crystal Aarsby.

Names of winners in Roots, Vegetables and Fruits class will be announced later, as owing to a mistake on the judges' part, the 1st in this class is not available.

NOTE

Miss M. E. Rogers, secretary-treasurer of the Agricultural Society, would appreciate if those who won prizes in class 24—roots, vegetables and fruits, would inform her of their awards, as owing to the judge in this class neglecting to enter up his prize-book, she has not got a complete list of the winners and will be unable to pay prizes until this information is forthcoming.

### Semi-Monthly Crop Report of Dept. of Agriculture

Since the previous crop report, issued on August 15th, harvesting weather has been particularly favorable. The weather has been comparatively cool, with bright sunshines. This has been ideal for filling and ripening.

Reports from the south and central parts of the province indicate eighty per cent. of the grain cut, excluding green feed, through the northern parts of the province, fifty to sixty per cent. of the wheat is cut and cutting of oats and barley well under way. Light frosts have occurred in various places, but no serious damage has been reported up to time of writing, which means that

## Come In and See Our Stock of HARNESS

We carry a Full Line of Horse Equipment

### REPAIRING OF ALL KINDS NEATLY AND PROMPTLY DONE

### Chinook Harness Shop

**S. H. SMITH,**

Proprietor,

Chinook

practically all the wheat is past the stage where it can be damaged and the greater portion of oats and barley are sufficiently well advanced to ensure a good sample. There is not sufficient threshing done yet to form an estimate of yields based on actual threshing returns, but the yield will be heavy and the sample good. All districts report plenty of labor, but wages are higher than usual.

### FIX UP

Fix up. The most humble cottage in our village can be made neat and attractive. A common-board fence, without plane or paint, can be made neat. Don't tie up your gate with a fence post. You can get a fastener for ten cents or make one yourself in thirty minutes without a cent of cost. It takes no money to burn up the old rubbish, fix up broken fences and make your home look home like. The busy and industrious find time to fix up their fences, but often the men who make little or no garden and let the yard resemble a last year's birds nest, are those who have the most leisure time on their hands.

**CANADIAN NATIONAL RAILWAYS**

# Good Roads Are Of Inestimable Value To the Rural Districts

The highways of a country are one of a nation's most important assets and play a large part in colonization and land settlement. The construction of good, serviceable highways, next to the building of railroads, is probably the chief factor in increasing the prices of land, while adequate marketing facilities, in the way of good roads, is an inevitable part of agricultural progress and prosperity.

A high grade of public thoroughfare, with a progressive and wide-awake policy of maintenance and extension, has decided bearing on immigration, and the lack of these facilities, in the eyes of intending farming settlers, seriously detracts from the aggregation many inducements. Again, it must be remembered that Canada's tourist traffic is an important and extensive feature of national wealth, and constitutes the fourth principal source of the country's revenue. As a great part of this touring is done by automobile, and this mode of travelling is increasing yearly, it is readily seen that the provision of good truck roads is necessary in order to keep up the traffic and further encourage it.

That Canada is alive to the necessity and desirability of maintaining substantial roadways and carrying out annually a program of extension, is evinced by the series of Federal and Provincial grants to this end. Expenditure on Canadian highways for the last five years has amounted to \$20,000,000, and the program at present being carried out will result in the disbursement of \$73,000,000.

Besides the active local road-building, county, municipal or provincial highway association exist for the co-

operation of these smaller bodies within the provinces and the furtherance of the provincial program. Annually, an interprovincial convention is held at some central point, and is attended by the various ministers of public work, highway commissioners, road-building experts from both sides of the line, where papers are read on all phases of road construction, ideas are exchanged, policies are devised and progressive projects advocated.

Just how important Canadian highways are to the people of the Dominion may be judged from the fact that they already aggregate 35,000 miles and the land appropriated for their construction, together with the improvements carried out thereon, amounts in value to no less than \$750,000,000. It has been estimated that for every mile the travelling public journeys on the railroads, 18 miles travel two miles on the highways. Canada's mileage averages one mile for every 22, whereas in the United States it is one mile for every 55.

The absolute necessity of good hard roads, so that the farmers may easily reach their market, is the biggest consideration in the building of Canadian roads, and the co-operation of farmers is enlisted by the local municipalities by rebating a certain portion of the taxes. The maintenance of easily travelled motor roads is another important consideration which is also followed with a progressive program. All principal centers of the Dominion are linked up by modern roadbeds and a coast-to-coast motor way has been advocated for some time; one by one the gaps are being bridged, and it will undoubtedly shortly come into existence.

## Want Higher Charge For Storing Grain

**Fort William and Port Arthur Terminals Would Raise Charges.**

Increases in the tariff charges for elevating and storing grain were asked on behalf of the Fort William and Port Arthur terminal elevators by J. C. Gage, in an application made to the Board of Grain Commissioners for Canada. He asked that the present one cent per bushel for elevating and storing grain be increased to one and one quarters. Reasons given were the increased cost of operation over other ports.

Fred W. Riddle, Saskatchewan Co-operative Elevator Company, supported the application and asked that the period of free storage be decreased from 15 to 10 days. Mr. Gage also applied for an increase in the rate for storing mixed grains and screenings. The increase asked for is from two to three cents for mixed grains and three to four cents for screenings.

## Worse Than a Czar

**Destruction and Death in the Wake of the Rule of Lenin.**

Lenin has been called an "inverted Czar." But this is too mild. No Czar ever inflicted such misery upon so many millions of people as has the fanatic and remorseless Lenin. The official reports of his own agents show how destruction and death have followed in the wake of his theories. There is no real government in Russia; only a ruthless dictatorship. No laws are passed; only arbitrary decrees are issued. The courts do not sit; merely the ferocious revolutionary tribunals continue to confiscate and execute. Talk of the worst of the Czar! He clashed with whips; Lenin flogs with scorpions. — New York Times.

**Discovery of Salts**

A discovery, the value of which is not known, but is being investigated, has been made at a point seventeen miles north of Viceroy, Saskatchewan, by a party of gentlemen visiting the district, of a deposit of crystalline salts. The area which is covered by the deposit is estimated to be about 200 acres. The greater portion of it is covered by about six inches of soil, and though a hole was excavated to a depth of three feet the bottom of the deposit was not reached. The salts will be analyzed to ascertain the commercial value.

"Is your husband having any luck with his garden?" "Oh, yes. He got a sunstroke and collected \$200 from a health insurance." — Boston Transcript.

## Making Life on The Farm Appealing

**Good Roads and Cheap Automobiles Should Play a Good Part.**

Since the war a problem which has been worrying agriculturists all over the country is that of keeping the boy and the girl on the farm. All the literature that I have seen on the subject shows quite plainly that no panacea has been discovered to meet the difficulty in connection with the exodus of the boys and girls from the farms. I think that hon. gentlemen will agree that we can at least go a long way towards solving the problem by adopting better farm methods; by making the home more attractive; by keeping better livestock; by making more profit on the farm, which will make possible more comfortable conditions such as will be conducive to happiness and contentment; by making everything we can tolerate for the farmer's wife; and generally by doing everything we can to make life on the farm appealing. In addition to this I think that good roads and cheap automobiles should play a great part in helping to keep the young people on the farms by rendering very valuable assistance to the farmer in different ways in connection with his work and by enabling him and his family to move around and mix with the neighbors thus obtaining some social pleasure out of life. — Hon. S. F. Tolmie, in the House of Commons, May 14, 1920.

## Mennonites Obeying Law

**Figures for School Attendance Are Higher Than Last Year.**

According to Premier Martin the latest reports reaching the Department of Education regarding the situation in the Mennonite settlements near Swift Current, show a considerable improvement and figures for school attendance are much higher than last year. This is not the result of any change of heart on the part of the Mennonites, but comes from the stern measures adopted by the government to compel the Mennonites to obey the education laws of the province. The Premier says that no little difficulty has been experienced in enforcing these laws, as many of the settlers prefer to spend ten days in jail rather than pay the insignificant fines imposed.

"Landlord, there are always a lot of strange people in bathing around here."

"Yes, madam. I'm sorry, but—  
"Well?"  
"Your rates do not include exclusive use of the ocean."

## The Death Toll of Speed

**Problem Demanding Grave Study by National Lawmakers.**

Some really startling figures have been presented to the National Safety Council of the United States, which is holding its annual session at Atlantic City. They deal with the rapidly increasing toll of human life that according to General Secretary S. J. Williams, is the price of the modern speed craze. "The 'motor menace,' as he calls it, has become a problem demanding grave study by national and state lawmakers, and by all organizations having to do with the public welfare."

Official statistics for the current year, according to the report of the Executive of the Safety Council show that "three times as many people are killed by automobiles as are killed in all the factories, mines, railroads and other industries in America." During the last four months one person was killed by automobile in the United States every thirty-five minutes. In that time the deaths from this cause were over twenty-five percent greater in number than during the similar period of the previous year.

The report adds, for the purpose of comparison, a British official statement dealing with the commercial development of the aeroplane. It shows that over 75,000 persons were carried upon aerial journeys in Great Britain last year with but one fatality.

According to the estimates prepared for the council the terrible death toll from automobiles is due almost entirely to reckless driving and the craze for speed. Ninety-seven percent of the fatalities are ascribed to these two causes. But because the killings have increased in an even greater proportion than have the number of automobiles in use the Council believes the situation should be given immediate consideration by the automobile makers of the country "unless they expect soon to be confronted by a great volume of hostile public opinion."

It must be clear that such a staggering death rate cannot continue without causing unusual action. Safety legislation can be tightened and strengthened, but legislation cannot do everything. The great need is for the development of a strong and effective sentiment among owners of automobiles themselves against the reckless drivers and the speed fiends. — Toronto Globe.

## The Returned Soldier On the Farm

**Work Accomplished by Calgary Branch of Soldier Settlement Board.**

Two thousand returned soldier farmers, occupying 480,000 acres of land in Southern Alberta, have been placed by the Calgary branch of the soldier land settlement board since February, 1919, according to the assistant superintendent of the board. The sum of \$11,286,000 has been loaned to the settlers, for the purchase of land, stock and equipment, \$8,000,000 having been paid out in 1919, when the demobilization and re-establishment of returned soldiers was at its height, and the sum of \$3,286,000 since the first of January, 1920.

## Out to Save

A north of Ireland man went into a post-office and handed over a telegram addressed to a remote part of Ireland.

The post-office clerk informed him that the charge would be one shilling and ninepence.

"How do you make that out?"

"Ninepence for the wire, and a shilling for portage and delivery outside the radius."

"That be hanged!" retorted the hard-headed Northerner. "You send the telegram, and I'll write and ask him to fetch it."

Wisdom is to put your trust in Providence, but it's unwise to go around looking for holes for Providence to pull you out of.

## Tip-Burn Disease On Potato Plants

**Growers Often Mistake Trouble For Late Blight.**

A trouble which is widely distributed and very prevalent in some seasons and to which the name "tip burn" has been given, is to be found among our potato crops. This trouble takes the form of a gradual burning and drying-up of the leaves of the plants, often commencing at a comparatively early stage in their growth and, in many cases, if allowed to go on unchecked, slowly but surely involving the whole of the plants so that they die down a considerable time before the tubers are developed.

The appearance of this trouble in the field is often mistaken by growers for late blight. There is, however, a marked distinction between the two, for late blight may commence by attacking any part of the plants, leaves and stems alike—has a dark, water-soaked appearance, and, in its early stages is damp to the touch, while tip burn invariably commences at the margin or tips of the leaves and has a decidedly dry appearance and touch with the exception of after rain. It also appears much earlier in the season than late blight has ever been known to come, and does not cause the death of the plants so rapidly. Nor has it ever been proven so destructive as late blight, although evidence has been obtained that in seasons when it is severe and where no effort is made to check it, a considerable reduction in the yield of marketable tubers, due to the premature death of the plants from this cause, may result.

Investigators of this trouble are not yet in agreement as to the cause. The observations of some have led to the belief that a period of hot, dry weather during the growing season causes the leaves to throw off moisture more rapidly than it can be furnished by the plant, the result being the appearance of tip burn. This belief seems, however, to be disputed by the fact that the trouble is not found in the hot regions of the western states, where the temperature often becomes excessive and the air is especially dry.

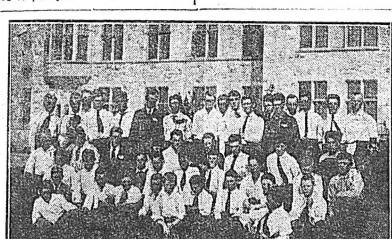

More recent investigations lead to the belief that this burning of the leaves probably follows the depredations of the insect known as the potato leaf hopper. These investigations are not yet complete, but enough evidence has been produced to serve as a warning to potato growers to keep these insect pests well under control in an endeavor to avoid tip burn.

We have found in our experimental work with potatoes that Bordeaux mixture will, to a large extent, control this trouble. In 1918, when it was extremely prevalent, we had several plots to which, for the purposes of experiment, Bordeaux mixture was not applied. These plots suffered from a severe attack of the burn and the plants were all killed down by the second week in August, while other plots on the same land, and to which, for the control of late blight, Bordeaux mixture was regularly and thoroughly applied, suffered to a very slight extent only, the plants remaining green until frost came. Bordeaux mixture acts as a repellent to the leaf hopper, as well as a protection to the plants. Many other cases in addition to that referred to have come to our notice bearing evidence that regular and thorough spraying with this mixture will reduce to a minimum the ravages of tip burn.

— GEO. PARTRIDGE,  
Asst. Plant Pathologist.

## Five Million War Prisoners

**A Berlin wireless despatch says, according to a League of Nations statement, the governments interested have placed \$5,000,000 at the disposal of Mr. Fridjof Nansen for the repatriation of the large numbers of prisoners of war still in Russia, Siberia and Turkestan.**

Group taken at the Farm Boys' Camp, 1919. One of the main buildings of the Saskatoon University in the background. The number of lads who attended the Saskatoon camp this summer was 175; at Regina there were 245 farmers of tomorrow.

## Scientific Methods In Farming Will Tend To Eliminate the Risks

Unlike the old lady who lived in the University of Saskatchewan has not so many children that it does not know what to do with them—every one. The child attending the rural school, the growing lad, the eager young man bent on a profession, the mother, the father—all in, way or another, are nourished by that good mother of the province, the University at Saskatoon.

Realizing that, comparatively speaking, only a few of her children can actually attend her institution, the university does everything possible to cater to the needs of those who cannot, for one reason or another, undertake a college course; and just as in olden times, when there were no schools, intellectual culture spread from the monasteries, so in this day and generation the University endeavors to distribute its spiritual bounty as liberally and as widely as possible.

One of the most promising phases of the department's work is that undertaken for young people—the men and women of tomorrow, many of whom will certainly find their way into course to the university itself. The Boys' and Girls' Club, formerly under the direction of the university extension department, is now directed by the department of education; but this year (under the former auspices) two large Boys' Camps were held, at Regina and Saskatoon respectively. Some 245 lads attended the former, and about 175 the latter. Both camps were outstandingly successful, and the experiment will be repeated and this phase of the work extended.

The Boys' Camps have been followed up by what is known as the "Follow Up" programme, whereby boys and girls are given the chance of buying pure-bred stock through the university. The condition is made that the young people undertake to provide proper shelter, feed and care for the stock, poultry or the grain supplied.

It does not require much imagination to see how well such a plan augurs for the future. A lad who has become keen on the best stock farm in youth will scarcely tolerate the presence of scrub cattle when he starts to farm in earnest for himself.

It should be said that the moral and physical development of the children is not overlooked in the clubs and camps. The co-operation of the Y. M. C. A. in this respect is highly valued and effective.

Perhaps the work among young people, giving them a bias in the direction of good farming thus early, is the most hopeful phase of the university extension department's manifold activities.

## New Use for Germs

**Prediction that Next War Would Be One of Dropping Germs From Airplanes**

In an address before a select group of prominent British scientists and officials, Dr. Charles H. Mayo, of Rochester, Minn., made the prediction that the next war would be one of bacteria dropped from aeroplanes over enemy cities. Gruesome as the prophecy may appear to the casual reader there is nothing extravagant in the suggestion. The recent conflict disclosed the extent to which the wide range of scientific accomplishments was employed in contradiction to the crudities of shooting masses of iron and steel at objects many miles distant. The Germans first resorted to poison gas; the poisoning of wells was another variation of their diabolical type of warfare, equally as different to the battles of old, when mere measured conquest in terms of muscle and physical fitness, as the employment of the visible organism which Dr. Mayo glibly predicts. Happily, however, the hope of civilization is not dead. When the debris of world domination, clumsy and secret diplomacy, and the twisted conception of international honor has been swept away, a reconstructed world may regret the incentive to do what the League of Nations has been designed to do until its present malady has been cured.—Victoria Times.

**No Respector of Persons**

A Scotch policeman in London was keeping the crowd away in front of the houses of parliament. A stout, excited woman endeavored to pass, but he restrained her.

"I'm the wife of a cabinet minister!" she insisted. "You must let me pass!"

The Scot eyed her unperturbed. "Madam, ye couldnae pass if ye were the wife of a Presbyterian minister!"

## Trails Blazed Across The Arctic

Amundsen Will Attempt to Drift Across the North Pole

Trails blazed across the Arctic ice pack a quarter of a century ago by Fridjof Nansen, Norwegian explorer, were expected to be followed, for a distance, by Nansen's fellow countryman, Captain Roald Amundsen, discoverer of the South Pole, when he left Nome, Alaska, recently on an attempt to drift across or near the North Pole.

Nansen, in 1895, attempting the same drift, sailed around Russia and Siberia and locked his boat, the Fram, in the ice off the New Siberian Islands, which lie in the Arctic north of Siberia. Amundsen, on leaving Nome, said he planned to sail to the New Siberian Islands, let his boat, the Maud, freeze in the ice and then allow the winds and currents to carry him where they wished.

Explorers' tales that an Arctic ocean current starts near the New Siberian Islands, runs through the Polar sea, across or near the pole, and finally ends at Greenland, the Atlantic, were used by both Nansen and Amundsen as a base upon which they made their plans.

Existence of the current has been disputed by many Arctic authorities, who claimed the wind and not the current determined the route of the ever-drifting Polar ice. Nansen, one of the first advocates of the theory, pointed to the fact that wreckage from the exploring craft, the Jeannette, destroyed near the New Siberian Islands, was found two years after the wreck along the Greenland coast. A "throwing stick" used by Alaskan Eskimos was found, it had been claimed, in driftwood on a Greenland beach. The wreckage and the stick, it was argued, lodged on an ice floe which carries them across the Polar wastes to Greenland.

Nansen found the drift not as strong as he expected, mainly because the Polar basin was much deeper than he had believed. He also discovered that the wind determined to a great extent the route of the ice drifts. The Fram was carried to within 350 miles of the pole and later cleared the ice near Greenland.

While the drifting Fram arrived at the 82nd parallel, Nansen attempted to reach the pole over the ice. With one companion he left the ship and, in what has been described as the most daring sledge journey ever undertaken, proceeded to the 86th degree, at that time, the farthest north ever reached by man. There he turned back.

## Canada's War Pictures Best in the World

Lewis Hind, Eminent Art Critic, Praised Collection

"There is absolutely no doubt that through the good work of Lord Beaverbrook and Mr. P. Konody, Canada has the greatest and the best collection of war memorial pictures in the world," said Mr. Lewis Hind, eminent English art critic and the author of a score of books, who was in Toronto to view the pictures at the Canadian national exhibition.

In this matter, Canada has beaten all the nations. England and France have quite excellent collections, but they do not compare with those of Canada. That of the United States is comparatively poor. Not only does the Canadian collection illustrate every phase of the war, but it is a record of the activity of modern art as well. Europeans will have to come here to see the Canadian war memorials as a complete record of modern art.

"The Canadian work as I saw it at the exhibition this year," said Mr. Hind, "displays a sense of color that is remarkable and a wonderful decorative quality. Canadian artists are painting Canada. Their work is racy, as it should be. They are going 'on their own.' If a certain number of pictures now being painted in Canada, were exhibited in London, it would have a very great effect, indeed, because Canadian work is not known there."

Mr. Hind was sub-editor of the Art Journal, editor of the Pall Mall Budget, and editor of the Academy.

"When you get your groceries today," said the butcher to his wife, "don't go to that little grocer next to my shop."

"Why not?" she demanded.

"Because he sent in yesterday and borrowed an old pair of my scales!"

## Breathe Deeply Then Listen For That Bronchial Wheeze

Dangerous to Neglect Troubles  
in the Chest Throat or  
Nose at This Season

Brough, wheezy breathing means danger ahead. Every day you defer treatment makes it harder to cure. Don't delay. Bronchial and lung troubles are all too frequent. Start with Catarrhozene. Take it in its pure balsamic vapor. Let the healing fumes do for you what stomach medicine never can. Nothing so certain as a Catarrhozene inhaler to strengthen a weak throat, to rid you of bronchitis, to drive out catarrh. Physicians endorse it; hospitals use it. Thousands swear by it. Two months' treatment, large size \$1.00; smaller sizes 25 cents and 50 cents, all dealers or The Catarrhozene Co., Kingston, Canada.

## To Save Sugar

Pinch of Salt in Jams Saves One Quarter of the Sugar

Housewives can economize on sugar used in making jellies and jams if they follow the advice of household experts. Experiments made indicate that in making jams or jellies one-fifth to one-quarter less sugar can be used.

The sugar saving wrinkle tested by the experiment kitchen is to add one-quarter teaspoon of salt to each cup of fruit juice for jelly or pulp for jam, marmalade and conserve. In the case of non-acid fruit this makes the absence of the full amount of sugar less noticeable. The salty taste will disappear after the product has stood for a few weeks, but the flavor will be much richer for the addition of the salt. Salt was used in England during the war, and the method suggested was based on report of the process.

With fruits of pronounced flavor or where lemon and orange peel or spices are used for flavoring those pieces are used for flavoring those with mild flavor, various syrups take the place of part of the granulated sugar. Usually half and half is the proportion used in substitution.

## Russia As It Is

Report of Prominent English Trade Unionist, Who Was Imprisoned

The London Times has an interesting report of a lecture recently given by H. Keeling, a prominent English Trade Unionist, who was imprisoned by the Bolsheviks for nearly a year. Mr. Keeling was in Russia when the war broke out, and last year went back to make further investigations. With much difficulty he reached Moscow and found it like a city of the dead. The press was completely muzzled, Red journals were being issued.

He was arrested and charged with being a dangerous and suspicious person, an English spy. He was placed in the Buttsky prison to await trial, and there visited by Litvinoff, who promised to do what he could to secure his release, but decided that his case must go before the People's Court. At this trial the "judge" was a young woman, assisted by two youths. He was not allowed to say a word in his own defense, as his remarks "would not be relevant." His sentence was imprisonment "until the end of hostilities with Imperial England and the Russian Federated Soviet Republic." The prisoners had a comfortable time, for the simple reason that all the prison officials from the Governor downwards hated the Bolsheviks. He most emphatically denied any statements that the present lot of the Russian workers was to be compared with that of the Britons.

## A Boylike Prince

Admiral Halsey, who escorted the Prince of Wales in Australia, must have had some anxious moments when the prince went careering off on a strange racehorse, for instance; and bored moments, when the prince with boyish delight danced and danced, forgetting the lateness of the hour. On one occasion in Melbourne as the prince showed no signs of retiring, the Admiral instructed the hand to play "God Save the King," by way of closing. When it was finished, the prince said, "Now that we have put father to bed, we will start again!"

Field pests are now kept in check by raking the rubbish in a pile, covering it with a sheet of canvas under which is introduced a jet of lime steam.

Canada is second to the United States in motor car production.

## Accredited Purebred Herds

Government Regulations for Tuberculosis-Free Accredited Herds

According to the regulations for the establishment and maintenance of tuberculosis-free accredited herds of cattle in Canada, a tuberculosis-free accredited pure-bred herd is one which has been tuberculin tested by the subcutaneous method, or any of the other tests approved by the Veterinary Director-General, and applied by the regularly employed veterinary inspectors of the Health and Animals Branch of the Federal Department of Agriculture. Further, it shall be a herd in which no animal affected with tuberculosis has been found upon two annual or three annual tests, as above described, and by physical examination.

## Farm Sells for High Price

An 480-acre farm two miles east of Clinton, McDonald district, Manitoba, has recently been sold for \$60,000 or \$125 per acre. There are some good buildings on the farm. The price is one of the highest that has been paid in that district and indicates the upward trend in the value of farm lands in Western Canada.

## How's This?

We offer \$100.00 for any case of catarrh that cannot be cured by HAL'S CATARRH MEDICINE. HAL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. Price 5c. Testimonials free.

## Ontario Sheep for Saskatchewan Farms

Livestock Commissioner Goes East To Secure Pure Bred Sheep

For the purpose of purchasing a number of choice bred sheep, J. G. Robertson, provincial livestock commissioner, has left for Eastern Canada, where he proposes to buy sheep for distribution among the farmers of the province. Mr. Robertson will also make an effort to pick up a few choice dairy-heifers. These animals will all be tuberculin tested and carefully examined to prevent the importation of cattle diseases into the province.

While he is down East Mr. Robertson will go to Quebec and take over the ten head of purchased registered Shropshire sires that have just passed quarantine.

"These Shropshires have just been imported into Canada from Great Britain by the Sask. Sheep Breeders' Association," said Mr. Robertson. "They come from the celebrated flock of T. A. Buttar, Corston, Coupar Angus, Scotland. The health and activity of the sheep breeders in thus endeavoring to improve the flocks of Saskatchewan by the importation of new blood is certainly to be commended, and will undoubtedly show good results in the near future.

## When Children Wage War

Saskatchewan school children have since spring destroyed more than 2,000 gophers and saved probably a million bushels of grain. This is the result of an energetic campaign instituted and carried out by the Saskatchewan provincial government with the co-operation of the municipalities and individual school districts in the province.

There are about 124,000,000 acres of standing pine in the lumber sections of the southern states.

## MOTHER!

California Syrup of Figs Child's Best Laxative

A boylike Prince

Admiral Halsey, who escorted the Prince of Wales in Australia, must have had some anxious moments when the prince went careering off on a strange racehorse, for instance; and bored moments, when the prince with boyish delight danced and danced, forgetting the lateness of the hour. On one occasion in Melbourne as the prince showed no signs of retiring, the Admiral instructed the hand to play "God Save the King," by way of closing. When it was finished, the prince said, "Now that we have put father to bed, we will start again!"

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure you are getting the best and most nutritious syrup for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

W. N. U. 132

## Co-Operative Dairying In Manitoba

A Province-Wide Co-Operative Enterprise Established

What is hoped will be an epoch in the history of dairying in Manitoba has recently been constituted when a province-wide co-operative enterprise, known as the Manitoba Cooperative Dairies, Limited, was registered under the laws of that province.

In view of the success of co-operative dairying in other parts of Canada, particularly in the Western provinces, the dairymen of Manitoba have become enterprising and convinced that co-operation offers a more profitable field than is to be found to individual and competitive methods of dairying. A co-operative dairy company was therefore formed with Mr. Carruthers, for many years general manager of the largest dairy company in the provinces, as its manager. The objects of the company, as set forth in the charter, are to purchase milk and cream from the farmers, to manufacture butter, ice cream and other dairy products, and to distribute fresh milk, cream and dairy products for city consumption. The company is also empowered to deal in dairy supplies, feedstuffs and other requirements of dairy farmers.

In order that this shall always remain a farmers' enterprise, it is provided that only bona-fide farmers, their immediate relations living on a farm, and farm employees may become shareholders.

Speaking of this new co-operative enterprise, and summarizing its advantages, the secretary of the Winnipeg district Milk Producers' Association says: "The association is province-wide in its scope. It will engage in all the ramifications of the dairy business. It will, we believe, be of immediate benefit to all of them. The experience everywhere has been that straight grain farming has had to give way to mixed farming. The spread of mixed farming means that eventually practically every farmer will keep cows and market milk or its products to a greater or less extent. Manitoba has got to follow the general trend in this direction. Our object should be to produce enough butter to butter every slice of bread which the wheat we produce will make. The farmers have a splendid opportunity in getting together behind a co-operative enterprise, the prospects of which are as wide as the future dairy industry of Manitoba."

## ACUTE ECZEMA ON BABY'S HEAD

Face, Neck, Arms. Terrible Sight. Itched And Burned. Cuticura Heals.

"Baby was two months old when I found a little pimple on his head. They kept on growing and spread till her head, face, neck and arms were one mass of eruptions, burning, itching, and bleeding," was told it was a terrible sight. "For one year I had no rest night or day."

"We got a bottle of Soap and Ointment and less than a week the baby began to mend and in a few months she was healed." (Signed) Mrs. Doorman, 243 McDonald St., Peterboro, Ont., April 19, 1919.

Stop the use of all doubtful soaps. Use only for all cold soaps. Price 25c. Order 25c and free. Sold throughout the Dominion. Canadian Dept. Lyman's, Limited, St. Paul St., Montreal. Cuticura Soapshare without tax.

## Cut your Own!

MACDONALD'S Brier Plug SMOKING TOBACCO

## Canadian Fire Losses

Fire Loss for 1920 May Exceed Any So Far Recorded

If the average of losses of the first five months of the year is maintained, fire losses in Canada during 1920 will reach almost \$28,000,000, according to figures made public by the Commission of Conservation. Should these figures be reached the losses will exceed any thus far recorded, with the exception of those incurred during 1918 through the destruction of 1,196 million dollars worth of timber plants. They already exceed those of 1919, an exceptionally favorable year, by over one-half million dollars, the total for the month's period being upward of \$11,000,000.

With disastrous fires in both the coast province and the far east and in the middle west during the past few weeks, it is almost a certainty that the estimate of the Conservation board will not be met but considerably exceeded.—Edmonton Bulletin.

## Canadian Cattle for Europe

Cattle From Dominion Becoming Known all Over the World

About two thousand head of Canadian cattle arrived at Antwerp, Belgium, a few days ago. The city of Paris, which is expected to complete a contract for the purchase of cattle in Canada, had two representatives on hand to examine the quality of the animals sent to Belgium, their condition on arrival and the requirements for receiving such cargo.

The quality of Canadian cattle has become known all over the world and numerous orders have been placed by the war-stricken countries of Europe to help replenish their depleted herds of horses and cattle. The export trade of livestock from Western Canada is now of considerable importance and is all the time increasing.

Nearly 15,000,000 acres in Canada are devoted to wheat growing.

## ONLY TABLETS MARKED

## "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross".

For Colds, Pain, Headache, Neuralgia, Toothache, Earache, and for Reactions. Then you are getting real Aspirin. Lambang, Lambang, Skins, No. 1, is the tablet Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists will also sell Aspirin "Bayer" plain.

Those in our Aspirin "Bayer" "You must say 'Bayer'"

"Bayer" is the trade mark (registered in Canada) of Bayer Manufacture of Monacetinester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitation, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

## The Puritan Seed

The Foundation to Which United States Owes Its Greatness As A Nation

America, as Americans are often eager to remind us, is a very mixed nation, an amalgam of many races, peoples and cultures. Yet through it all the New England spirit, the New England outlook on life, is predominant. If it has sometimes been overshadowed by the south, it has prevailed in the west and the middle-west. It was the "Yankee" who two hundred years after the landing on Plymouth Rock, set out on new pilgrimages beyond the Ohio and the Mississippi, who ploughed the desert and the prairie with his wagon-trails and brought the railway to the Pacific. Composite as the nation has become, its texture is all interwoven with the thought and the ideals of the energetic bands of settlers who were quickly building up civilized free communities on the North Atlantic coast in the seventeenth century. As the seed sown by the Puritan exiles from which the bountiful harvest has grown. Surely never did results so vast daily from such small beginnings!—Daily Telegraph.

Paper Mills for B.C.

Pulp and Paper-Making Plant Will Probably be Established

At Prince George

Announcement is made by Hon. T. D. Patullo, head of the timber department of British Columbia, that a great pulp and paper-making plant will probably be established at Prince George.

Innumerable stands of spruce and balsam near that city have been investigated this summer by representatives of eastern concerns who may erect a large plant.

As a result of the shortage of newsprint and the resultant increase in price, the pulp and paper industry is receiving a great impetus. The enormous stretches of big timber throughout British Columbia offer a great inducement to the paper manufacturers and several plants are proposed in different parts of the province.

When a woman tugs at a man's heart strings it is likely to pucker his purse strings.

## Could Not Sleep

Mr. Ernest Clark, Police Officer, 338 King St., Kingston, Ont., writes:

"For three years I suffered from nervousness and sleeplessness. I believe my condition was brought about by overwork. I had frequent headaches, neuralgic pains and twitches of nerves and muscles. I had indigestion, was short of breath and easily tired. I commenced a treatment of Dr. Chase's Nerve Food, and seven boxes of this medicine cured me of all my symptoms. I am now feeling one hundred per cent. better than I was, and have to thank Dr. Chase's Nerve Food for the good health I am now enjoying."

Dr. Chase's Nerve Food, 50 cents a box, \$8 for \$75, all dealers, or Edmundson & Co., Ltd., Toronto.

**Dr. Chase's Nerve Food**  
EDMUNDSON & CO., LTD.

## Canada's Pension Bill

Estimated There Will be Heavy Increase for Next Twelve Months

The last pension cheques before the new scale are now being issued. These are the August pension cheques, which have been going out from the pension board offices here since August 10. The September cheques will carry the increases recommended by the special parliamentary committee.

Canada's pension bill for the twelve months ending August 31 this year will be, it is estimated, in the neighbourhood of \$25,000,000. With the increases going into effect on September 1 of this year, it is estimated that the pensions bill for the next twelve months will be increased by \$10,000,000 and the total will be \$35,000,000.

## Faint and Dizzy Spells, Weakness and Shortness of Breath.

You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, smothering sensations, weak, sinking, gone feeling, choking sensation.

Many men and women become rundown and worn out when they could be strong and healthy if they would only pay attention to the first signs of heart weakness.

No remedy will do so much to make the heart regain strength and vigor, regulate its beat and restore it to health and normal condition as Dr. Chase's Nerve Food Pills. Mrs. C. A. Drake, Paris, Ont., writes: "I have used on towards the second box of Millburn's Heart and Nerve Pills and they have done wonders for me. I had frequent dizzy spells, once in a while, and also weakness and shortness of breath, and would become so choked up at times I could hardly sleep without sitting up in bed. I would have to stop and try to catch my breath. I feel a lot better since I have used your pills and know that they have helped me wonderfully as I have improved very much. Price is 50¢ a box at all dealers or mail direct or receive a receipt of price by The T. Milburn Co., Limited, Toronto, Ont."

## What British Sport Costs

Millions Spent Each Year on Various Kinds of Sport

John Bull spends \$340,000,000 each year on sport. Horse racing, which heads the list, accounts for nearly that sum. There are 265 days of each year devoted to this sport alone, and more than 1,500 events. Next on the list comes hunting, which costs him \$50,000,000, shooting costs \$40,000, angling \$20,000,000, cricket \$15,000,000, football 12,500,000, golf \$7,500,000, cycling \$7,500,000, yachting \$5,000,000, coursing \$2,500,000, on the remaining outdoor sports of all sorts \$240,000,000. So large is the sum that, if it were converted into gold, it would require a train a mile long to transport it. So heavy is the gold spent on sport in one year that it would require 7,540 porters to carry it, each with a burden of a hundred-weight. If John Bull made a golden carpet of the forty-eight million sovereigns, people to the number of over 182,000 could comfortably stand on it.

It is a jury indeed when the twelve good men are compelled to listen to long-winded lawyers.

W. N. U. 1122

## True to Tradition

Upholding High Standard Set by the Mounted Police in

## The Past

The provincial police are upholding the high standard set in the past by the old "Mounties," and while both they and the mounted policeman Corporal Usher, underestimated the train bandits, whom they were attempting to arrest, no criticism can be possible of the manner in which the attempt was made.

A U. S. Marshal would have shot first and ordered hands up after his man was got, but such is not and never has been the Canadian practice, and while occasionally valuable lives have been lost by sticking very staunchly to legal methods, it is very unlikely that either the R.C.M.P. or the A.P.C. Police will ever resort to American methods, at least until the criminals are known as these Australians are now known to be gun men and desperados.—Calgary Herald.

## NO EXPERIENCE NECESSARY

The idea that bread making is a long and difficult operation is a mistake, as bread may now be included in the list of quickly prepared foods, for with

## ROYAL YEAST CAKES

light, sweet bread can be baked and ready for use within four hours from the time the sponge is set. Full detailed instructions are contained in Royal Yeast Bake Book which will be sent free upon request.

E. W. Gillett Company Limited, Toronto, Canada.

## Wheat in Eighty Days

Importance of Perfecting the Early Maturing Varieties

Captain Howell of Grande Prairie started cutting Ruby wheat on August 11th, with prospects that the yield will be heavy and of a high grade. It took but eighty days from time of sowing for it to ripen. One hundred days has been the time hitherto accepted as necessary for the process, and it is impossible to exaggerate the importance of the work of Dr. Saunders in perfecting the early maturing varieties. Dean Howes, of the university faculty of agriculture at a board of trade luncheon, used the success of Saunderson's experiments very effectively as an illustration of the importance of giving the most liberal facilities for agricultural experimental work. Twenty days in most Western Canadian crop seasons makes a very great difference. The saving of time means the extension of a long distance to the north of the area in which wheat growing may be carried on with a reasonable degree of safety.—Edmonton Journal.

## New Lumber

## Industry Planned

Sash and Door Factory for Mission, British Columbia

Construction of a \$135,000 sash and door factory is being planned at Mission, British Columbia, by the Canadian Western Door Company, which has recently been organized with a capitalization of a quarter of a million dollars, according to a report from that city.

The company plans to establish one of the most modern and up-to-date sash and door factories on the Pacific Coast, with a capacity to start with 1,000 doors per day (or approximately 600 doors and 500 window sashes)—a carload of finished product a day. The plant when completed will employ about 75 people with a payroll amounting approximately to \$10,000 per month.

## Seed Rye Exports

Calgary grain men state that seed rye may be exported to the United States without being subject to any restrictions or regulations other than those ordinarily met with in the customs department. Seed rye entering the States is not subject to duty. In order to ship the product across the line, it is necessary to procure "foreign" cars, as American rolling stock in Canada is designated by the grain dealers, and once loaded on these the grain may be sent to any point under the same conditions as a shipment in Canada is made.

## MONEY ORDERS

Dominion Express Money Orders are on sale in 6,000 thousand offices throughout Canada.

good many men who try to ride the wheel of fortune puncture the tire before they get very far.

## A MOTHER'S TRIALS

Care of Home and Children Often Causes a Breakdown

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health while her children's welfare exacts heavy tolls, while hurried meals, broken rest and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through weakness, neuritis, rheumatism, etc. Many women have grown to accept these visitations as part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple—she is not well. When she is, is the woman's good health that keeps her well; when ill she must make her blood rich to renew her health.

The nursing mother more than any other woman in the world needs rich blood and plenty of it. She can only have good blood so necessary to perfect health, and that is through the use of Dr. Williams' Pink Pills. These pills make new blood, and through their use, thorough and rapid recovery has been made.

They have been much brighter, cheerful and strong. If you are ailing, easily tired or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a trial. What this medicine does for others it will surely do for you.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50¢ a box or six boxes for \$2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

## Not So Bad

The "nervy" young officer sat down at a table in the vegetarian restaurant. "Crushed nut, sir?" asked the waitress, handing him the menu of the day.

"No, no; shell-shock," he replied. London Bit-Tits.

**J. R. MILLER**

**M. D. OF COLLHOLME, No. 243**

Chinook, Alta., September 1st, 1920

TO THE RATEPAYERS OF THE M. D. OF COLLHOLME,

**— Re MUNICIPAL CROP LIENS —**

I have been instructed by the Council of the Municipal District of Collholme to notify you that your indebtedness for seed and feed grain, and for relief, if any, must be paid. You are advised to pay it out of the first grain marketed. The elevators have been furnished with a list showing the amounts owing. Haul enough to one of the elevators. Sell it and have the elevator agent deposit the amount to the credit of the Municipality in the Bank of Commerce, Youngstown, or in the Union Bank, Chinook. Be sure to deposit enough. Any little surplus may be applied on your taxes. The bank will notify me and I will at once forward you a receipt, the presenting of which will enable you to market the balance of your grain anywhere, without further inconvenience. Remember this indebtedness is a lien on all crops grown on your lands. This lien, this year, cannot be disregarded, without rendering yourself liable to severe penalties. The Municipality has done its best in standing by its ratepayers during these years of repeated crop failures, and now, with a fair crop in sight, payment must be made. In a way it is hard, but it must be done.

Signed on Behalf of the Council,

LORNE PROUDFOOT, Sec.-Treas.

genuine. Apply R. S. Gordon,  
1319 10th St. West, Saskatoon.

**Important Notice****TAX RECOVERY ACT**

To all parties whom it may concern:  
Take notice that the provisions of  
the Tax Recovery Act are operative  
for the year 1920, within the bounds  
of every municipality, urban and  
rural, and every Improvement District  
of the Province of Alberta.

The land will be advertised for sale,  
as soon after August 14th as possible,  
by the Municipal taxing authority  
and on the day and hour and at  
the place mentioned in the advertisement,  
will be sold for the taxes in  
arrears as of date December 31st,  
1919, together with the costs. Owners,  
mortgagors, encumbrancers, and  
any others interested should com-  
municate with the municipal authority  
levying the tax. The arrears and  
costs may be paid up to the time of  
sale, and after the sale there is one  
year for the redemption of the land.

**Local News**

Auction sale bills printed at  
this office.

Gun licences are to be had at  
the Banner Hardware.

Mr. Crockett paid his regular  
weekly visit to town on Friday.

Mr. Dowler, station agent here  
made a flying trip to Calgary on  
Sunday.

Dr. Bridgeman, B.A., of Sask-  
atoon, eye specialist, will be in  
Chinook again on Sept. 24th.

Advertisers are particularly re-  
quested to note that changes of  
advertisement should be in this  
office by noon on Tuesday.

Church services will be held on  
Sunday at Laughlin School at  
11 a.m.; Ed. Proctor's residence  
at 3:30 p. m. and in Chinook  
Church at 7:30.

The Second Annual School  
Fair for this district will be held  
in Chinook, on Thursday, Septem-  
ber 23rd, 13 schools are tak-  
ing part in the Fair.

Bert. Smith has returned to  
his old position in Mr. Woodruff's  
hardware store. Calgary has  
lost its charm, and we're all glad  
to see him back here anyway.

Mrs. D. McKenzie has returned  
from Calgary, where she was  
a patient in the Holy Cross  
Hospital. Her condition has  
now very much improved.
